

A baby elephant is standing on a green adjustable pedestal. The pedestal has a warning label and a 'MADE IN AMERICA' logo. The background is a light blue and white pattern.

BURR KING®

HEAVY-DUTY ADJUSTABLE PEDESTAL

According to industry professionals Ergonomics are the No. 1 most common workplace safety incident. In fact, ergonomic stress injuries cost nearly \$30 billion a year and in more extreme cases can cost up to \$60,000 in medical treatments, lost time and vocational rehabilitation.

In January 2010 OSHA began issuing citations under the General Duty Clause. The clause states that each employer shall furnish a workplace free from recognized hazards... and now they are beginning to issue fines to companies that don't comply.

The adjustable pedestal allows the operator to adjust the equipment to promote proper posture and reduces operator fatigue. As the old saying goes, "it's better to be proactive than reactive."

Call and ask about the Adjustable Pedestal today!

INCREASE PRODUCTIVITY AND REDUCE INJURY

HEAVY-DUTY ADJUSTABLE PEDESTAL

ERGONOMIC DESIGNS REDUCE WORKER INJURY AND INCREASE PRODUCTIVITY

Lost productivity due to operator fatigue is not the only thing that you risk when you or your employees don't have their machines at the ideal height. You also open your company up to law suits and doctors fees which may cost tens of thousands.

If a photo is worth a thousand words the pictures above have the potential to save you thousands of dollars. At its lowest eight the pedestal measures 27" tall to accommodate an operator, but if that same machine is used by another operator on another shift or even the same shift, the operator can quickly adjust the pedestal to the ideal height for their ideal work posture.
