

Blade Sharpening Belt Grinders

Experience Incredibly Fast Blade Sharpening

OREGON®

A Clean Edge

Blade Sharpening Belt Grinders

Oregon® Blade Sharpening Belt Grinders offer fast sharpening, long life, outstanding belt tracking, and consistent contact points. A 30° fixed-angle workrest allows for easy and consistent sharpening of mower blades, and the ceramic-coated belt reduces heat for faster sharpening.

In addition to straight lawn mower blades, flexible configurations allow for sharpening mulching blades, rotary-style, offset flail blades, and chipper blades. Plus, our chain saw bar attachment makes dressing chain saw guide bar rails quick and easy.

Model 760

88-100 with pedestal
88-101 without pedestal

The 760 3-wheel grinder provides maximum versatility. Contact wheel, platen, and a 30° fixed-angle workrest support ensures precision grinding. The 760 offers positive belt tracking, quick belt change, and easy belt tension.

- + 1-1/2 HP motor
- + Fast sharpening with 8,000 surface feet per minute belt speed
- + Longer life and better tracking with a 90 durometer serrated contact wheel
- + Accurate 30° fixed-angle workrest support
- + 1-1/2" x 60" ceramic-coated abrasive belt on 3-wheel design for increased durability
- + Sharpen irregular shaped blades with removable vertical platen
- + Rugged cast aluminum frame
- + Chain saw guide bar table attachment included

Model x400

88-102 with pedestal
88-103 without pedestal

The x400 is a fast, compact, and versatile grinder for any application.

- + 1 HP motor
- + Fast sharpening with 8,000 surface feet per minute belt speed
- + Longer life and better tracking with a 90 durometer serrated contact wheel
- + 1-1/2" x 48" ceramic-coated abrasive belt
- + Sharpen irregular shaped blades with removable vertical platen
- + Rugged, pivoting cast aluminum frame
- + Optional chain saw guide bar table attachment
